

MOBILE WORK CENTER FOR MANAGERS

The future is here!

Manage time and attendance, schedules, PTO, work orders, equipment service and inspections — at any time and from any place using any mobile device.

MITC allows managers to use their mobile devices to monitor operations, resolve exceptions, and solve problems such as no-shows.

MITC is designed to suit the way managers naturally communicate in today's fast-paced world. Time and attendance, schedules, personnel, training and work orders, and equipment and inspection records can all be managed from a tablet or smartphone device such as Android™, iPhone®, BlackBerry®, or iPad®.

Automated text/email alerts keep managers on top of their jobs. Alerts include no-shows, job over/under budget, work orders overdue, equipment needs servicing, inspection due, and more.

Over 1,500 customers with 5 to 10,000 employees have selected MITC to help control payroll costs, save time and improve competitiveness. MITC is designed for building service contractors who can no longer afford the costs associated with a jumble of systems that don't integrate and aren't effective.
