

MOBILE WORK CENTER FOR MANAGERS

The future is here!

Manage time and attendance, schedules, PTO, training and licenses — at any time and from any place using any mobile device.

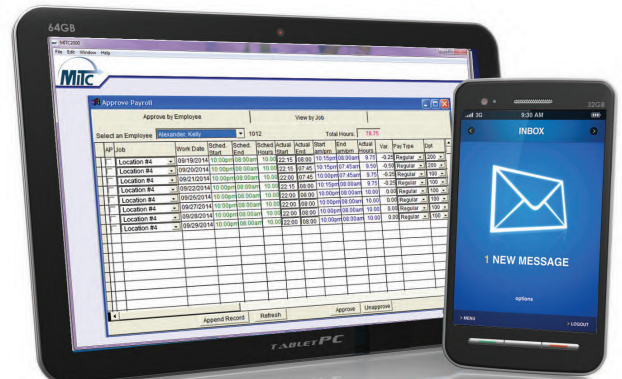

MITC allows managers to use their mobile devices to monitor operations, resolve exceptions, and solve problems such as call offs and no-shows. Powerful queries identify suitable replacements quickly.

MITC is designed to suit the way people naturally communicate in today's fast-paced world. Time and attendance, schedules, personnel, training, and license history can all be managed from a tablet or smartphone device such as Android™, iPhone®, BlackBerry®, or iPad®.

Improve attendance by reminding employees about their next shift automatically. Automated text/email alerts keep managers on top of their jobs. Alerts include no-shows, missed check calls, open positions, employees banned, licenses expiring, employees need training, and more.

Over 1,500 customers with 5 to 10,000 employees have selected MITC to help control payroll costs, save time and improve competitiveness.

MITC is designed for security contractors who can no longer afford the costs associated with manual or multiple systems that are neither integrated nor effective.
