

WORK ORDERS AND EQUIPMENT TRACKING

Process Work Orders at Any Time, from Any Place

Main Features

- View, enter or edit work orders and equipment repairs at any time and from any place
- Eliminate paper work orders and delays in processing orders for startup, completion or billing
- Maintain a database of recurring and individual work orders
- Send automatic emails to managers for upcoming or outstanding work orders and equipment that needs inspection or maintenance

Project Scheduler

Recurring Work

- Schedule recurring projects in advance
- Generate work orders from calendars

Work Orders

- Enter individual work orders at the office or from a mobile device
- Track scheduled, completion, and billable status
- Retain unlimited work order history
- Comprehensive robust reporting included
- Notify managers automatically by email of overdue work orders

Equipment

- Maintain a central database of all equipment by location

Repairs and Service

- Track service records

MyMITC for the Web

MyMITC allows organizations to use mobile devices to monitor operations, resolve exceptions and solve problems.

Manage work orders and equipment service records from any web-enabled device, at any time and from any place.

Eliminate costly alternatives with MITC's affordable purchase, rental or hosted plans.

- MyMITC supports web-enabled devices such as Android™, iPhone®, BlackBerry®, and iPad® tablets
- Licenses can be purchased or rented
- MITC's applications are hosted on your server or by MITC Cloud
